

Integrated Accounts Payable Automation

With native PeopleTools integration, AP Express for PeopleSoft is a cloud-based AP automation solution for invoice entry and approval, resulting in faster invoice processing time and improved accuracy. Accessed via a web browser, AP Express runs securely in the cloud. Some features, such as invoice approval, are also available on your mobile device.

SMART FUNCTIONALITY

AP Express leverages control data from your PeopleSoft application to enable the creation of invoices which are later imported, along with the invoice image, as vouchers are created in PeopleSoft AP.

AP Express Functions as an Extension of PeopleSoft

Nivo1's in-depth knowledge of PeopleSoft, as well as how the accounts payable process works, allowed us to design AP Express for PeopleSoft to function as an extension of your PeopleSoft application. We can automate your invoice processing without making any modifications to your PeopleSoft installation.

We designed our integration to work with existing PeopleSoft infrastructure, to leverage standard business processes, and to use terms already familiar to you. We even designed the AP Express user interface (UI) to make it easy to use for users accustomed to the PeopleSoft UI.

The close integration of cloud-based AP Express and your PeopleSoft ERP suite extends your PeopleSoft Payables application to give you a more complete view of your organization's payables liability while minimizing staff training.

Contact Nivo1 Today to Learn More About AP Express for PeopleSoft

With AP Express, your AP process can be automated in 30 business days or less, with no hardware or software purchases. Contact us for a demo today!
